

## ADAPTERS

### FIBER OPTIC ADAPTERS

# ADAPTERS

Fiber optic adapters are used in fiber optic connection, the typical use is to provide a cable to cable fiber connection. People sometimes also name them to be mating sleeves and hybrid adapters, mating sleeves means this fiber optic adapter is used to connect the same type fiber optic connectors, while hybrid adapters are the fiber optic adaptor types used to connect different kinds of fiber optic connectors.

TTAF fiber optic adapters have a name for its stability, they provide reliable solution for fiber connections, single mode fiber optic adapters and multimode fiber optic adapters available on request. TTAF adapter high quality raw materials and make these fiber optic adapters strictly according to international standard, this makes our fiber optic adapters fully compatible with the products from other manufacturers' in the market.

TTAF fiber optic adapters are characterized by high quality and there are many types dedicated for different clients needs.

#### APPLICATION

- » Telecommunication Networks
- » CATV Networks
- » Metro Networks
- » Cable TV Applications
- » Data Processing Networks
- » LAN&WAN
- » Industrial, military and medical applications
- » Broadband
- » Multimedia
- » Active Device Termination
- » Instrumentation
- » Telecommunication and computer Networks
- » FTTx, FTTH

#### FEATURES

- » Telcordia, ANSI, TIA/EIA and ISO Standard Compliant
- » High stable mating and de-mating characteristics.
- » Available with ST, SC, FC and LC connectors.
- » Standard product available as pigtail.
- » Pre-installed pulling eye kits available.
- » Low Insertion Loss and High Return Loss
- » High Reliability and Stability
- » Accurate Dimensions
- » Simplex and Duplex Panel cutouts
- » Available without flanges or with flange for duplex, saving panel space
- » Meet JIS5974 and bellcore GR-326 standard
- » Compliant with IEC874-14&IEC874-19
- » RoHS Compliance
